A child's "I Can Quotient" is often a more useful measure for determining the ability to thrive and succeed in life than the traditional IQ. Learn strategies to increase your child's sense of feeling connected, capable, competent and courageous.

For more than 30 years, PEP has offered positive parenting education and support to parents throughout Montgomery County, Northern Virginia and Washington, DC. Like all PEP programs, this talk will give you insights into ways to use positive, encouraging methods with children that gain cooperation, teach respect and responsibility, and bring out the best in you and your child.
